# FREQUENTLY ASKED QUESTIONS

## ❖ Is there a minimum as to how long we work together?

Many agencies typically require a 3 month minimum, but we prefer to always serve at our clients' best interest. **Month to month, no contracts, purely service.**

## ❖ How long before we see results for our paid traffic efforts?

It depends on what we're measuring for - more followers, more revenue, etc. **We typically see results past the 2 week mark** but THAT'S if website is traffic ready. Our last client literally saw a 7x ROAS within 5 days..

## ❖ How big is the team I work with?

On the contrary of how good "big teams" look, and how swanky offices come off - **we pride ourselves in being a team of 5 specialized remote marketers.** Faster communication, no internal office politics, unbound by geography, and concentrated focus. With this, we protect ourselves by choosing the clients we want to work with.

# FREQUENTLY ASKED QUESTIONS

## ❖ How much experience does your team have?

No, we haven't been around for 40+ years. The digital age literally began less than 15 years ago. **But, we've worked with brands generating over 7 figures monthly all the way to brands generating 6 figures yearly. We've managed well over 2 Million in Ad Spend, so we know a thing or two about Facebook Ads.**

## ❖ How long does the onboarding process take?

**The onboarding process typically takes 24-48 hours.** Again, this is where we pride ourselves in being focused and agile.

## ❖ What if we're not happy with our results?

This can happen. We'll never guarantee you results because at the end of the day, it's the markets resonating with your product. We bring your product to as many eyes as possible. Not manipulate them to buy your product. **But, we always hold our clients' hand through every step of the way, even if it means solving problems together. This is why we only do month-to-month. So you have no obligation to stay with us for 12+ months.**
